Experience

WebMob Technologies

Ahmedabad, Gujarat

Web Developer

Sep 2023 – Mar 2024

- Developed a robust multi-tenancy application using Laravel framework, demonstrating proficiency in architecting and implementing scalable solutions for diverse client needs.
- Implemented Yajra DataTable integration in Laravel application for streamlined data presentation and improved user interaction.
- Utilized blade templating, layout design, localization, routing, middleware integration, and eloquent ORM in diverse projects, ensuring efficient development of scalable web solutions.
- Implemented role-based access control system within Laravel applications to restrict unauthorized access to administrative login portals. Significantly enhanced user experience while safeguarding sensitive data.
- Contributed to Magento projects through customized development tasks, optimizing functionalities to align with specific project requirements and enhance overall performance.
- Created and published a Magento extension/package on composer, extending functionality and accessibility for users within the Magento. Link: <https://github.com/rz0705/Add-Fields-on-Customer-Account-Page-for-Magento-2>

Rankway Technology Pvt. Ltd

Ahmedabad, Gujarat

Web Developer Intern

Apr 2023 – Jul 2023

- Managed end-to-end development of web applications within Laravel's request life cycle, ensuring robust performance and functionality.
- Implemented MVC design patterns and structured folder organization to maintain clean and organized code.

Brainvire Infotech Inc.

Ahmedabad, Gujarat

Web Developer Intern

Oct 2022 - Mar 2023

- Designed and configured Magento 2.x eCommerce website modules, enhancing site functionality.
- Created custom Magento templates for improved user experience and site appearance.
- Constructed Magento 2 stores from scratch, including custom module creation and shipping method implementation.
- Applied MVC framework and OOP concepts proficiently in project execution.
- Proactively troubleshooted and debugged issues throughout development and testing phases, ensuring project integrity.

Projects

- **Grocery app**
 - Developed a PHP application for streamlined product management, featuring robust filtering options for efficient data sorting by date criteria, enhancing user navigation and interaction.
 - **Github link :** <https://github.com/RonitZinzuvadiya1040/Grocery-App>
- **Authentication app using laravel**
 - Developed role management functionality within the application to distinguish between user and admin roles effectively. Implemented login authorization mechanisms to restrict unauthorized access for both users and administrators, enhancing security and maintaining data integrity.
 - **Github link :** <https://github.com/rz0705/Laravel-Authenticate-User-And-Admin>
- **Email Verification using laravel**
 - Created email verification system as part of the user registration process within the application. Configured automated email dispatch functionality to facilitate seamless communication for email verification purposes, ensuring a secure and validated user registration experience.
 - **Github link :** <https://github.com/rz0705/LaravelEmailVerification>
